

ESPERO MOVABLE WALLS PRODUCT BROCHURE

Visio 100

Transparency with outstanding sound insulation
for optimum comfort.

Houthaven Community School - Amsterdam

At this multifunctional educational facility, Espero's Visio 100 Elite lets the various schools transform their respective assembly halls into one single large open space in no time.

ESPERO

PRODUCT VISIO 100

Light and luxury combined

The Visio 100 glass panel wall makes it possible to create a luxurious and bright space with outstanding sound insulation performance. Transparency and aesthetics come together perfectly in the glass wall. You can find it in noisy classrooms, luxurious party venues and stylish meeting rooms.

Flexibility and convenience

The Visio 100's wall panels are made up of 100mm-wide aluminium frames with double glazing. The separate panels slide effortlessly in a track in the ceiling, allowing you to easily and silently arrange them in numerous different ways and park them. When arranged in line and locked they make a stunning-looking seamless wall.

Espero's patented Quick locking mechanism guarantees easy and smooth operation. All it takes to open or close the hermetic sound-insulating seals is a 180-degree turn of the control lever. For even greater ease of use, there is the semi-automatic version, which locks into place with the press of a button.

Sound insulation

A wall that creates a sense of open space, while preserving privacy. This is thanks to the extending hermetic seals at the top and bottom of the panels, sound-insulating rubber seals along the sides, and the various glass thicknesses and compositions. It gives the Visio 100 wall a sound insulation rating (Rw) of between 42 dB and 50 dB.

One Life project – Antwerp, Belgium

While closed, this wall creates a sound-insulating space for meditation or yoga. When the wall is opened, the space can accommodate presentations or other classes.

Finish options

We can customise the glass finish to your ideas and requirements for the rest of the space. Echo the style of the interior with an etching, print or foil finish on the movable wall, or go for frosted glass. There is also the option to install horizontal blinds in the Visio 100's flexible wall panels. Ideal for meeting rooms. If you want maximum transparency, choose the optional telescopic wall jamb, the end piece of the wall that is mounted to the structural wall.

Two versions:

- 1. Visio 100: light and modern.** The standard Visio 100 version comes with fully transparent glass and anodised colourless aluminium cassettes, giving the wall a modern sleek look. The cassettes contain the structure and control mechanism. As an extremely attractive extra option, the cassettes and aluminium wall profiles can be supplied in the colour of your choice. We can supply panels with a special purpose, such as doors, with a wood finish of your choice.
- 2. Visio 100 Elite: unique and top class.** The luxurious version comes with a coated frame on the inside of the glass. As standard, you can choose the colour for the glass frame. As an optional extra, you can also choose a colour for the cassettes and wall profiles. Other than with the standard version of the Visio 100, the Elite's doors and telescopic panels also come with glass for maximum transparency. We use solid coated glass for parts that are not transparent, such as door frames, so as to give the entire wall the same luxurious look and ensure the panels make a seamless whole.

Key Visio 100 and Visio 100 Elite features and benefits

- Transparency and aesthetics combined.
- Individually movable panels with a wide choice of arrangement and parking options.
- The only Cradle to Cradle Bronze certified movable wall in the market.
- User-friendly operation with Espero's patented Quick locking mechanism.
- Available with semi-automatic operation as an option.
- Choice of certified sound insulation ratings (Rw) from 42 dB to 50 dB.
- Removable glass to enable cleaning on the inside.
- Available in extra clear glass.
- Effortless top track installation in all types of ceiling.
- Great in combination with the Sonico.

Operate the Visio 100 with the Quick locking mechanism.

NEC - Hilversum
A Visio 100 works particularly well in this bright space.
